

A-level Computer Science at The Blue Coat Sixth Form

Bridging Unit: 3

Bringing it all together

This element of the bridging unit pulls together all the elements from the previous two units.

Your Task

Your task is to create a website all about the topic of 'Consequences of using computers'.

The site must include your responses to the questions in previous unit, as a minimum. More information would be good.

Obviously, you will be coding in HTML, try and use CSS and JavaScript as well.

This is your chance to show us what you are capable of, you can incorporate any features you like, as long as the website works when we open it!

If you have any issues please email: aballantyne@blue-coat.org or amkandawire@blue-coat.org
